

# EVIL BIKES

## FRAMES / SOVEREIGN

The Sovereign frame is available in two sizes, Regular (23.14 tt), and Long (24.14 tt)  
Colours: Blue, Black, Silver & Green

£850

The Sovereign frame is designed for riders who give it their all on the street, in the park, or on the forest trails. Equally at home with a rigid fork and slick tires or a 5-6 inch fork and knobbies, this bike can help you to push your riding limits and have a blast doing it.

Its custom triple-butted Reynolds 853 and 725 steel frame structure is one of the most meticulously crafted high-end steel framesets that we have ever seen. The frame's asymmetric monostay design allows for an incredible 15.5 minimum chainstay with a 26X2.3 tire. This yoke design also offers the ability to run up to a 16.75 inch chainstay for trail rides, and can fit a huge 3" wide tire for those big hit riders. Its XX-Rated bolt-on dropout system allows riders to use standard QR wheels, with gears OR a singlespeed setup, and never worry about wheel slippage.

### SOVEREIGN FRAME Features:

- Custom triple butted Reynolds 853 & 725 tubeset
- Designed for 24 or 26" wheels
- Superalloy head tube, dropouts, and chainstay yoke
- XX-Rated adjustable dropouts
- Asymmetrical monostay fits a 26x2.3 tire at 15.5"
- Low top tube
- 3" wide tire clearance

## FRAMES / D.O.C

The D.O.C. frameset is available in two sizes, regular and long, and two colors, blood red and black.

£450

In early 2004, Evil Bikes teamed up with Canadian born riding icon Chris Donahue to develop a signature model frame that would be fitting of the Donahue and Evil names. This frame is named for Chris' love of riding and the energy associated with it. It is Chris' Drug Of Choice.

The D.O.C. uses a custom developed steel tubeset. Its triple butted air hardening tubing is made by Reynolds in the U.K. This custom tubeset and unique brace tube frame design allows for use of a 31.6 seatpost, and lets riders choose trail or park seat heights. Its head tube, chainstay yoke, and dropouts are made from an Evil proprietary steel alloy that is 135% stronger 200% harder than the standard 4130. This builds a stronger head tube and dropouts that can stand up to unparalleled abuse. The D.O.C. also uses an innovative asymmetrical chainstay yoke design that allows for a short 15.75 inch chainstay length with a 26 x 2.3 tire.

### D.O.C FRAME Features:

- Chris Donahue signature geometry
- Designed for 24 or 26" wheels
- Custom Triple Butted Reynolds 631 front triangle
- Evil proprietary superalloy head tube, dropouts, and chainstay yoke
- e.thirteen HVS bolt-on sliding vertical dropout system
- Integrated dropout tensioners
- Asymmetrical monostay fits a 26x2.3 tire at 15.75"
- Low top tube
- 3" wide tire clearance
