£110

DUALRINGSECURITY

The DRS Chain Retention System has been the leading dual ring compatible system since its introduction in 2001. Its simple to adjust and maintain flip-flop roller design gives unparalleled performance and reliability on the trail. This system is perfectly matched with the new breed of long travel trail and bike park complete bikes.

FEATURES
Adjustable Abrasion modified slider
Silent running Flip Flop roller technology
Legendary Supercharger bashguard
'E-type' Derailleur upgrade option

SPECIFICATIONS
Available bolt patterns: 5 x 110 & 4 x 104
Available Bashring Sizes: 36T, 40T

£110

SUPERSTREET

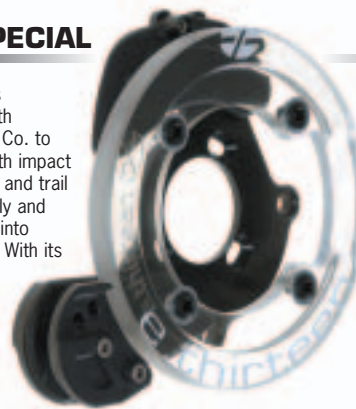

The SST 26T micro drive chain retention system is a direct result of the e.thirteen formula program. It was developed to provide high strength impact capability for demanding street riders who frequently and intentionally smash into immovable objects. With its included 26T ring and Micro Drive Supercharger, the SST is the most compact chain retention system available.

FEATURES
Abrasion modified sliders
26th Micro Drive Supercharger **NEW!**
26T Crownwheel included **NEW!**
Comes fully assembled **NEW!**

SPECIFICATIONS
Available bolt patterns: Fits 3/4" spindle 3-piece cranks only
Available bashring Sizes: 26T only

£149.95

32SPECIAL

The 32 Special was developed along with Specialized Bicycle Co. to provide high strength impact capability for street and trail riders who frequently and intentionally smash into immovable objects. With its 32T capacity, the 32 Special is the most compact chain retention system available for 4-104 bolt pattern cranksets.

FEATURES
Long wear composite sliders shed mud and debris **NEW!**
Tech 2 idler **NEW!**
Legendary Supercharger bashguard
Comes fully assembled **NEW!**

SPECIFICATIONS
Available bolt patterns: 4 x 104 only
Available bashring Sizes: 32T only

£125

LIGHTGUIDE1

The LG1 is a new chainguide system developed to meet the rigorous demands of World Cup downhill racing. The LG1 is an extremely strong, reliable, and adjustable system with the lightest weight of any chainguide that we are aware of on the market today.

FEATURES
Adjustable long wear composite sliders shed mud and debris **NEW!**
Tech 2 idler **NEW!**
Weights only 195 Grams
Comes fully assembled **NEW!**

SPECIFICATIONS
Available bolt patterns: Compatible with all
Available bash ring sizes: N/A
Chaining size compatibility: 34T-44T

£110

SUPERCHARGER

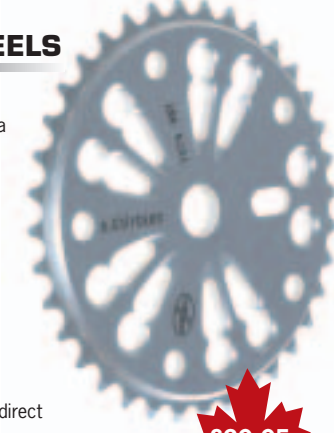

The first and only successful full thermoplastic bashguard ever made. Obscenely strong, surprisingly lightweight, and no metal to bend.

FEATURES
Proprietary TuffMax thermoplastic alloy deflects huge impacts
4-104 BCD in 32T, 36T, 40T, 42T & 44T sizes
5-110 BCD in 36T, 40T, 42T & 44T sizes

FEATURES
Clear sides allow you to see how much beer is left in glass
Logo print makes you the envy of your mates
Approximate capacity: 1 pint

£13.95

Meet the Guide Picker

Introducing our new Guide Picker!

The new guide selection tool is the first of its kind. By answering a small series of questions, this new tool will help you find the models which will best fit your needs. When a number of models will work, the Guide Picker will allow you to compare the appropriate choices in a recommended order. The Guide Picker takes into account the number of rings you'd like to run, the rear suspension travel, the type of chainstay design incorporated into the frame and your riding style. Coupled with our always informative Fit Chart, now with over 260 frame models, you shouldn't have any problems finding the right guide. Check it out! See www.e13components.com for more details.
