Rails: Ti-alloy  
Weight: 285g

Pack Quantity Piece  
Price : £0.00 inc VAT

### Overview

Developed specifically with women in mind, the Allure delivers attributes that relieve and eliminate soft tissue pressures. The Allure starts with a durable nylon fibre base material, yet appropriately softens ups with the anatomically shaped cut-out.

The lightweight LPU foam blends with the cut-out and supportive platform in the Optimal Rideable Area (ORA) of the Allure. The seamless, plush microfibre top material is the final element that makes this tool so Alluring.

Ideal for a multitude of disciplines, from Road to Mountain and available in variable railed options and stylish cover options.

- Lightweight women's performance saddle.
- An anatomic full foam and base cut-out to further relieve soft tissue pressures.
- Slight down curve at the nose to help with relief when riders shift weight or adjust forward on saddle.
- Synthetic leather top with cut away side profile.
- Lightweight EVA foam.
- Dupont Nylon composites.
- Injection molded tail and nose bumpers.
- Size: 265 x 143mm.
- Weight: 285g.
- Optimal Rideable Area (ORA): 110-140mm (Medium - Large).
- Disciplines: Mtn (XC, Trail, Enduro, DH), CX, & Road (Endurance & Racing).
