EASTON
CYCLING

-EA8022616

Material: Easton Aluminium
Weight: 290g (42cm)
Clamp Diameter: 31.8mm

Pack Quantity Piece
Price : £79.99 inc VAT

Overview

Easton's new AX series line of bars meets the needs of the growing drop bar adventure and gravel segment. Building off the highly successful and critically acclaimed line of new MCD road bars and EA70 and EC70 AX bar utilizes the same top shape and reach as well as the ergonomic drop shape but turns up the drop flare from 4 degrees all the way up to 16 degrees. The wider stance in the drops provides more control on gnarly terrain and long gravel assaults. Why 16-degrees? Based on extensive testing and rider feedback we determined that 16 degrees was the perfect balance of maximum bar flare that still allowed for efficient access and usage of the shifters and brakes in both the hoods and drops.

Features

- **Width** - 40, 42, 44cm at hoods (at drops +68mm).
- **Flare** - 16 degrees.
- **Weight** - 290g (42cm).
- **Reach** - 80mm.
- **Drop** - 120mm.
- **Material** - EA70 Alloy.
- Diameter 31.8mm
