

## Knog PWR Lighthouse 1000L

KNOG-12062

Lighthouse output: 1000 Lumens  
Dimensions: 36mm x 35mm  
Weight: 48g

Pack Quantity Piece  
Price : £44.99 inc VAT

### Overview

The PWR Lighthouse 1000L uses an elliptical style beam for broader and brighter road coverage, combined with an additional ring of "be seen" LEDs. This modular lighthouse can also be swapped between small, medium and large PWR Bank batteries for longer runtimes.

When Knog designs each light, we put optics at the heart of that equation. Whether it's new LED formations, or beam patterns, we are committed to making each lumen work harder once you're on the road. If you do more than one type of riding then this modular light system will let you expand your product range without shrinking your wallet. Get a stronger lighthouse for brightness, or a bigger battery for runtime.

### FEATURES

- **Compatibility** - The 1000L lighthouse is compatible with the 3350mAh, 5000mAh and 10,000mAh PWR Banks.
- **Program your modes** - Plug your lighthouse into your computer, download the ModeMaker app and then tailor light modes to your light.
- **Light Beam** - Lighthouse with elliptical plus spot beam. Especially effective to "be seen".
- **Accessories Included** - Male-Female USB cable.

### SPECIFICATION

- **Lighthouse Output:** 1000 Lumens.
- **Dimensions:** 36mm x 35mm | y.
- **Weight:** 48g.

## INSTRUCTIONS

- **Operation:** PWR Lighthoods have no buttons! Instead we use rotation to switch the light on & between modes.
- **To turn light On / Off:** Rotate the lighthood until it stops and hold in place for 1 second or until the light turns on / off.
- **To change the modes:** Once the light is on, you can simply change the mode by rotating the light head until it stops. It will spring back into position.
- Colour : Black
