

Knog Strongman D-Lock Bike Lock

knog.

-KNOG-12037

Dimensions: 200 x 130 x 35mm

Materials: Silicone / Steel

Weight: 1.1Kg

Pack Quantity Piece

Price : £71.99 inc VAT

Overview

The toughest, rock solid, and high-security Strongman. Combining hardened steel housing with investment cast stainless steel cover and a 13mm hardened steel shackle, over-moulded with UV resistant silicone. Basically means it won't mark or scratch your bike but could kill a beast.

The Knog Strongman has a torsional strength that can withstand forces of up to 2kNm of combined twist 'n' mass force and is frost, dust and corrosion resistant.

The Strongman U-lock is both Stitching ART (3 star) and Sold Secure Gold accredited*, which are the highest security accreditations in the UK and Netherlands for Bicycle Security Systems.

SPECIFICATION

- **Dimenions:** 200 x 130 x 35mm
- **Shackle:** 13mm hardened steel shackle
- **Weight:** 1.1Kg
- **Lock Barrel:** High security disc style lock barrel with over 5000 unique key variations.
- **Accessories (INCLUDED):** Dedicated mounting bracket system to attach the Strongman U-Lock to your bicycle.
- **Minimum mounting Bar Diameter:** 25mm

FEATURES

- **U-Shackle Security:** Heat-treated specifically to create balance between hardness (cutting resistance)

and toughness (for tensile and impact resistance).

- **Secure Mechanical Assembly:** The main advantage to a single-piece investment cast lock housing is that it forms a highly-secure mechanical assembly by reducing available points of leverage.
- **Lock Mechanism:** Double deadlock mechanism with spring-loaded keyhole.
- **Accreditations:** The Strongman is ART 3-star accredited and Sold Secure Gold Rated.
- **Material:** Silicone overmoulded plated hardened steel U-lock.
- **Weather Resistant:** Dust, corrosion and frost resistant.
- **Body:** Investment cast steel, with compression moulded silicone outer. Injection moulded engineering plastic, UV painted exterior.
