### Overview

Finally, a durable, lightweight, UST Tubeless™ compatible wheelset that you afford without selling the farm! Talk about trickle down technology: the EA70 XCT takes some of the best features of the more-expensive Easton tubeless mountain wheels (welded Easton aluminum rims, butted spokes, a generous 19-millimetre internal rim width and sealed cartridge bearings), all at an impressive value. These are equipped with the advanced UST rim so you get to run your favorite tubeless rubber. And the stealthy grey-on-black graphics will make any trail or XC bike look much meaner.

### Specification
